CHINESE AGRICULTURAL PUBLICATIONS FROM THE REPUBLIC OF CHINA SINCE 1947

Library List No. 81

NATIONAL AGRICULTURAL LIBRARY,
United States Department of Agriculture,
Washington, D.C.

PREFACE

The National Agricultural Library has collected Chinese publications for a century and maintains one of the largest collections of Chinese books and periodicals in the agricultural-biological fields. The present bibliography contains only Chinese publications from the Republic of China since 1947. It does not include Chinese publications issued in the Mainland under the National Government, nor the Communist Chinese publications issued since 1949. For the former group, a separate list will be prepared in the future; and for the latter, two bibliographies have been published: Communist Chinese Monographs in the USDA Library (Library List No. 71, 1961) and Communist Chinese Periodicals in the Agricultural Sciences (Library List No. 70, revised, 1963). Japanese serial publications issued in Taiwan before World War II have been included in Japanese Serial Publications in the National Agricultural Library (Library List No. 72, 1962).

Two other bibliographies of Oriental publications in the agricultural fields that have been prepared by the Library are: Korean Publications in the National Agricultural Library (Library List No. 79, 1963) and Oriental Serial Publications in the Zoological Sciences (Library List No. 80, 1963). Free copies of the lists are available upon request.

The present bibliography was compiled by William J. C. Logan under the direction of Leslie T. C. Kuo. Calligraphy was done by Peter B. Schroeder, who also assisted in checking the materials used.

EXPLANATORY NOTE

This bibliography contains two major parts: serial publications and monographs. Serial publications include periodicals, documents and reports issued under a single title for an indefinite period of time, and monographs include books and publications in numbered monographic series with a separate title for each individual issue. Serial publications are listed in alphabetical order, and the following information is included for each:

1. Title in English romanization of the Wade-Giles system, in Chinese, and in English translation. Translations supplied by the editors of the publications are indicated with quotation marks.
2. Frequency of publication.
3. Publisher in English translation.
4. National Agricultural Library call number.
5. For some titles, a brief annotation on the general nature and contents of the publication; changes of title and frequency; availability of table of contents and resumes in foreign languages; and other pertinent information.
6. Holdings at the National Agricultural Library.

Monographs are grouped by subject, and are arranged in alphabetical order of the authors within each group. The following information is given for each of the publications:

1. Author in English romanization of the Wade-Giles system, and in Chinese (for individual authors) or in English translation (for corporate authors).
2. Title of the publication in English romanization, in Chinese and in English translation.
3. Publisher in English translation and place of publication in English romanization.
4. Date, edition, volume, and number of pages.
5. National Agricultural Library call number.
6. In most cases, a brief annotation on the general nature and contents of the publication.

The bibliography also includes a list of publishers (in English translation and Chinese), an index to titles of monographs (in Wade-Giles romanization and original English translation), and an author index.
